Widgets already in an open workspace display grayed out in widget list.

Activating a Widget

There are two ways to activate a widget in the Related Items pane.

To add it to the current workspace, drag it out of the pane and release it over a widget in the workspace.

To work with the widget in a separate workspace, click the widget while it is still in the pane. To close that workspace later, hover over its tab and click the Close (X) button.
